The federal structure around Australian Training Packages

Australian Industry and Skills Committee

- Established in May 2015
- provides leadership and guidance to the VET system
- draws on advice from the new Industry Reference Committees
- Approves and funds work to be undertaken on training products
- Approves completed Training Packages for endorsement

Hygiene and Sanitation

Industry Reference Committees (IRCs)

- drive the process of Training Package development
- made up of people with experience, skills and knowledge of their particular industry sector
- are responsible for ensuring that Training Packages meet the needs of employers
- Lead the development and review of Training Packages
- Inform Training Package development priorities
- supported by independent and professional Skills Service Organisations (SSOs)

Hygiene and Sanitation

Skills Services Organisations (SSOs)

- support Industry Reference Committees (IRCs) in the review and development of training products, including skills standards and qualifications
- SSOs are accountable for providing technical, operational and secretariat services to enable their IRCs to undertake their industry engagement and Training Package development and review activities.

Hygiene and Sanitation

The bigger picture

- A time of turbulence and industrial strife and a poor OH&S record in the meat industry
- A new focus on developing export markets
- ANTA was formed 1992
- Competency-based training was a new concept
- Training Packages were being developed for the first time
- Different qualifications in every state
- MINTRAC was a 'Recognised Body'

Four Year Work Plans

- Purpose:
 - offer strategic insights into emerging skills needs across industry sectors
 - identify a strong case for change
 - provide strong links between proposed changes and industry need
 - consider the opportunities presented by training package reform directions announced by Ministers in November 2015
 - establish a review process for Training Packages
- all in draft form – have been out for consultation
- are due to be submitted to the AISC by the end of September 2016

Future Training Product Reform project

- being led by the Victorian Government on behalf of the Ministerial Council
- No information available!

Review of the Training Package Development and Endorsement Process Policy

Consultation and development process has just commenced

WHAT ARE THE CHALLENGES FOR MEAT RETAILING?

- What do you like most about the current butchery qualifications?
- What is the single biggest challenge for you as a trainer?
- What is the single biggest challenge for the apprentices?
- What is the single biggest issue for employers of apprentices?
- Where are there gaps in the butcher qualification?
- Are any of the current units becoming redundant?
